PA + SOUND ENGINEER + PERFORMANCE LIGHTING

Heard clearly. Felt properly.

PA and sound engineering are included for the agreed event setup. Equipment and coverage are confirmed against your venue, guest numbers and technical requirements before booking. Larger or outdoor spaces may require additional hire.

A stage with atmosphere.

Band performance lighting is included for the agreed setup. Lighting coverage and equipment are confirmed around your venue and brief. Full-venue lighting, staging and additional production are quoted separately.

A fuller experience with Gold.

Nine musicians, layered backing vocals and a sax-and-trumpet horn section, supported by a higher sound-production allowance. More musical texture, more live interplay and production planned for the expanded line-up.

Tell us your venue, guest numbers and whether the performance is indoors or outdoors. Larger spaces or additional technical requirements may need extra production, agreed in your final quote.
